SIP vs PRI

28%
Monthly Savings Realized
That's $4,471 average annual savings for a company with approximately 115 employees.
Gartner

BEYOND ∞

The average SIP trunk scales from 5-2000 ports and unlimited trunks are available.
You can have exactly the number of lines you need, when you need them.

🚫 86

There's no need to "86" your existing infrastructure— using your existing equipment, SIP can seamlessly connect legacy and next-generation solutions and deliver end-to-end, rich multi-modal communications.

The amount of hassle involved in implementing and administering SIP trunks.

ZERO

In fact, most enterprises already have the in-house skills and online tools to make configuration and management simple.

100% + MORE

All your current features will still be available.
Plus you'll get new connectivity & device options and multimodal features such as video conferencing, presence and chat.

🔊

Clean & Clear
That means unmatched call clarity that meets enterprise requirements and exceeds legacy systems.

It's not alphabet soup. It's the strongest commercially available encryption that ensures privacy and integrity of your communications. IntelePeer offers it for Lync and Cisco systems. Make sure your SIP provider offers it.

Five 9s

That means 99.999% network availability, automatic failover and rapid disaster recovery for a robust system you can rely on.

Now that the truth is out there,

IT'S TIME TO
MOVE TO
SIP

Interoperability and equipment certifications with countless technology vendors and network providers give you global reach with plenty of options.

Let us help you move to SIP today.
Its easy, we promise.
www.intelepeer.com

Despite the rapid expansion of SIP trunking in the enterprise, there's still a lot of misinformation floating around designed to discourage its adoption.

The truth is, SIP is the Unified Communications solution.

Let us count the ways.

IntelePeer.
