

Big Solutions for Businesses of Any Size

SD-WAN NOW: The ultimate tool to prioritize your network based on YOUR needs

The features and benefits that SD-WAN provides to large global corporations can seamlessly apply just as well to businesses of all sizes—thanks to SD-WAN NOW from ACC Business.

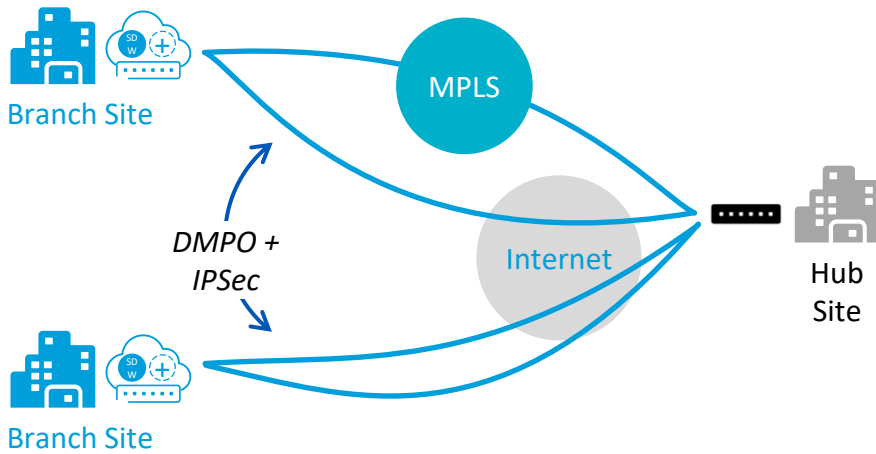

SD-WAN NOW provides a cost-effective and scalable solution that works over virtually any access with software-controlled, application-based routing. This allow businesses to improve cost, performance, and reliability.

Designed specifically for small & medium businesses, SD-WAN NOW comes built-in with a wealth of benefits:

- **Application Recognition & Traffic Prioritization** – Recognize over 3000+ critical business application signatures (e.g., O365) with Deep Packet Inspection (DPI) and prioritize network traffic
- **Predictable & Highly Reliable Performance** – Latency sensitive applications like VOIP, UCaaS, VDI benefit from the real-time remediation mechanisms (e.g., eliminates artifacts in real-time video applications)
- **Network Visibility** – Via the Online Orchestrator portal near-real-time reporting is available on the performance and health of the network
- **Highly Secure Networking** – Built in enterprise grade firewall and the adoption of IPSec tunnels to connect to non-SD-WAN sites and distributed Multi-Path Optimization (DMPO) tunnels to SD-WAN sites, offers a high level of security
- **Dynamic Multi-path Optimization (DMPO)** – Steers applications to use best WAN link(s) in near real-time, based on business policies and link quality to offer the best user experience
- **Transport Agnostic** – Utilize virtually any connectivity option, from broadband and LTE to MPLS and dedicated Internet, to help create a future-ready, scalable network.

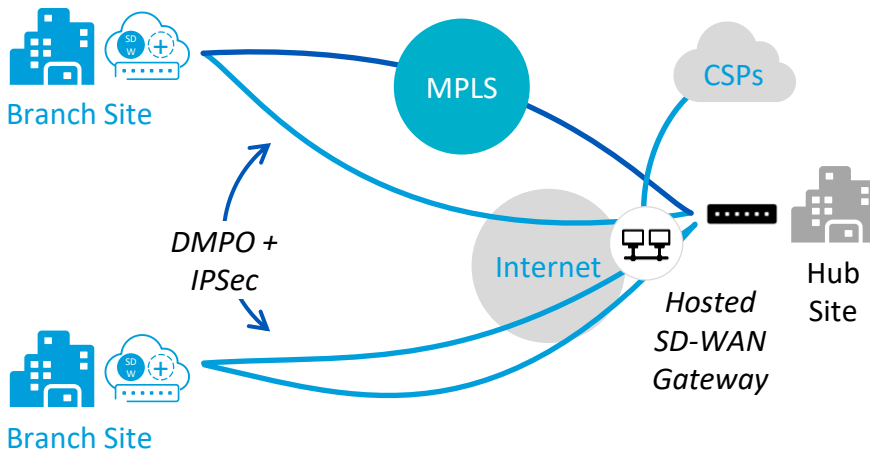

How it works:

Enterprise Subscription

- **Dynamic Multi-Path Optimization (DMPO)** + IPsec tunnels between branch sites and hub sites
- Access to cloud is without dual-ended SD-WAN capability

Premium Subscription

- **Cloud-hosted** SD-WAN gateways with built-in redundancy
- **Dynamic Multi-Path Optimization (DMPO)** tunnels to cloud apps, including SaaS and IaaS

Transform your network.

ACC Business can guide you through every aspect of network transformation, including:

- Technical Solution Design Support
- On-line Orchestrator Portal
- Installation Management
- Remote Monitoring & Management
