

Move your business to flexible, wireless internet

Ready to break free from your current internet provider? Now you can get business-grade Fixed Wireless Internet service from T-Mobile® for Business with plans starting at \$25 per month, plus taxes and fees.

What is Fixed Wireless?

Fixed Wireless Internet delivers internet over the T-Mobile network that can replace or provide backup to your wireline connection.

Why Fixed Wireless?

78%

of IT decision makers are using or considering LTE or 5G as the only WAN link in their branch locations.

26.4M

small businesses rely on internet access to run their business, yet do not have a failover solution.

\$26.5B

in lost revenue as a result of internet downtime.

5G: Capable device required; coverage not available in some areas. While 5G access won't require a certain plan or feature, some uses/services might. See Coverage details, Terms and Conditions, and Open Internet information for network management details (like video optimization) at T-Mobile.com. **Fixed Wireless General Terms:** Qualifying business account and capable device required. Qualifying credit, deposit, \$10 SIM card, and, in stores & on customer service calls, \$20 assisted or upgrade support charge may be required. U.S. data only; does not include voice, messaging, roaming or international service. Not combinable with some rate plans. **After monthly data allotment pooled plans incur \$3.75/GB charge (partial megabytes rounded up), and tiered customers see max 600Kbps speeds (with lower speeds than other customers during times of network congestion due to data deprioritization).** Certain uses, e.g., some speed test apps, may not count against high-speed data allotment or have speeds reduced after allotment reached. We notify you of approaching use thresholds via SMS; review your device's user manual to ensure receipt; may require third party software. Log in to your T-Mobile account to see usage. May be limited to 10 simultaneous connections per line. Monthly Regulatory Programs (RPF) & Telco Recovery Fee (TRF) totaling \$1.16 per line (\$0.15 for RPF & \$1.01 for TRF) apply. **Video** streaming resolution depends on available speeds. For best performance, leave video streaming applications at their default resolution setting. **Coverage** not available in some areas. **Network Management:** Service may be **slowed, suspended, terminated, or restricted** for misuse, abnormal use, interference with our network or ability to provide quality service to other users, or roaming. See T-Mobile.com/OpenInternet for details. See **Terms and Conditions (including arbitration provision)** at www.T-Mobile.com for additional information.

Put T-Mobile Fixed Wireless Internet to work for your business

WHAT CAN YOU DO WITH IT?

- Replace your current internet provider
- Add failover protection
- Add a parallel network

WHO IS IT FOR?

- Ideal for any location with up to 50 employees needing internet service
- Any business that can't afford internet downtime
- Retail or other small businesses needing to run kiosks, digital signage, points of sale, or employee internet on a separate network

WHAT DOES IT COST?

As little as \$25/month, plus taxes and fees

The benefits of T-Mobile Fixed Wireless Internet include:

- Plans built for your data consumption starting at \$25/month, plus taxes & fees.
- Day one internet; no long lead times associated with wireline installs.
- No annual service contracts.
- Use of your own compatible wireless router.
- T-Mobile is NOW America's largest AND fastest 5G network. Find out why T-Mobile's 5G wireless network is better for business.
